

# McMaster Annual Update in Rheumatology 2025

ICE CONGRESS CENTRE  
KRAKÓW, MAŁOPOLSKA, POLAND**Fri, May 9, 2025****PART 1****Disease stratification, personalised medicine and treatment advances in rheumatology: Parallels with other conditions**Prof. Bhaskar Dasgupta  
(Anglia Ruskin University, UK)**Rheumatoid arthritis stratified management**Prof. Ernest Choy  
(Cardiff University School of Medicine, UK)**Systemic lupus erythematosus stratified management**Prof. Frédéric Houssiau  
(University of Louvain, Belgium)**ANCA vasculitis stratified management**Prof. Christian Pagnoux  
(University of Toronto, Canada)**PART 2****Systemic sclerosis stratified management**Prof. Maggie Larché  
(University of Calgary, Canada)**Axial spondyloarthritis stratified management**Prof. Elena Nikiforou  
(King's College London, UK)**Psoriatic arthritis stratified management**Prof. Laura Coates  
(University of Oxford, UK)**CPPD deposition and other crystal arthropathies stratified management**Prof. Geraldine McCarthy  
(University College Dublin, Ireland)**PART 3****Still's disease stratified management**Prof. Lorenzo Dagna  
(Vita-Salute San Raffaele University, Italy)**Polymyalgia and giant cell arteritis stratified management**Prof. Bhaskar Dasgupta  
(Anglia Ruskin University, UK)**Fibromyalgia stratified management**Prof. Jacob Ablin  
(Tel Aviv University, Israel)Single-day and three-day  
registration available at**mircim.one**

## Point-of-care rheumatology ultrasound (POCRUS): A scenario-based workshop

ICE Congress Centre  
Kraków, Małopolska, PolandSat, May 10, 2025  
9:00-17:00**Speakers and trainers**

Prof. Bhaskar Dasgupta (Anglia Ruskin University, UK), Dr. Anna Ciechomska (University of Glasgow, UK), and others.

**Target audience**

Physicians. This workshop will appeal to rheumatology consultants, senior speciality trainees, as well as allied health professionals and general practitioners managing busy rheumatology services who wish to apply management decisions swiftly and effectively.

**Rationale**

Probability-based algorithms in rheumatology add significantly to the efficiency of condition evaluation, categorization, and management in patients presenting to early arthritis and fast track clinics.

This hands-on event complements the pioneering APLAR online POCRUS course on a scenario-based approach to

rheumatology. The workshop consists of **8 hours** of activities: lectures, live demonstrations, and hands-on practice, with discussion of illustrative cases.**Content**

- + Overview of the probabilistic approach and its specific application to different presenting scenarios such as polyarthritis, oligoarthritis, monoarthritis, polymyalgia, suspected GCA, and large vessel vasculitis
- + Case discussions and hands-on practice on patients with different rheumatology scenarios
- + Demonstration and practice of appropriate ultrasound scanning techniques and protocols

**Educational objectives**

- + Understand common presentation scenarios in rheumatology
- + Apply a probability-based approach to evaluate individual presentations

- + Understand the role of consultation ultrasound in the probability-based algorithm
- + Recognize specific and sensitive ultrasound signs/patterns
- + Confirm/exclude different scenarios by applying ultrasound findings
- + Understand the individual settings and procedures for ultrasound scanning

**Live demonstrations and supervised hands-on workshops**

- + Principles for applying ultrasound in rheumatology scenarios
- + Standardized sonographic scanning in clinical scenarios for rheumatoid arthritis, spondyloarthritis, gout/crystal arthritis, PMR/GCA
- + Use of color Doppler ultrasonography and ultrasound system settings
- + Identification of vascular sonoanatomy
